ATTN: Aaron Luong
680 South Lemon Avenue
City of Industry, CA 91789

Dear Mr. Luong:

Subject: Parts Manufacturer Approval (PMA)
Project Number: PM17236LA-T

This is response to your letter dated May 14, 2019, requesting Part Manufacturer Approval (PMA) engineering design approval be extended to include the Airbus A318 series and the Airbus A321 series as shown with the resulting listed article number(s) for the approved eligibility based on test and computation.

Article Name & Article Number	Aircraft Make/TCH Eligibility & Model/Series Eligibility
Tube Assembly- Flash P/N 9DX404700-01UA	Airbus A318 series, A319 series, A320 series, A321 series, A330 series, A340 series

We have reviewed the data submitted and find they meet the requirements of Title 14 Code of Federal Regulations (CFR) § 21.311. We noted the design approval on the PMA supplement(s). Note that this is a notification letter only and does not constitute design or production approval. We sent the PMA supplement(s) with your application(s) to the Federal Aviation Administration, Los Angeles/Van Nuys MIDO Section, 3960 Paramount Blvd. Suite 100, Lakewood, CA 90712. They will grant production approval after validating your Quality System. The FAA-PMA letter and PMA supplement from the Los Angeles MIDO Section documents that approval.

Minor design changes must be submitted to the Los Angeles ACO Branch at regular intervals not to exceed the agreed time frame.

We concur with your determination that installation of your PMA'd articles do not require supplement instruction for continued airworthiness (ICA).

Should you have any questions in regards to the engineering aspects on your PMA supplement(s) for project PM17236LA-T when received from the MIDO, please contact Mr. James Allison at (562) 627-5315 or by email at james.allison@faa.gov.

Sincerely,

Mansour Rafat
